Brass "SWEEPERS"
expand outward along
the inside of the barrel
clearing and
collecting debris.

CLEAN SWEEP™

The Revolutionary Shotgun Cleaning System

No other tool will clean the entire length of the bore like the Clean Sweep. A clean shotgun will result in more consistent shooting and enhanced accuracy.

The brass sweepers expand outward along the inside of the barrel clearing and collecting debris. Designed to expand as *the bore diameter changes* into the cone to the shell chamber where conventional brushes simply cannot reach! This cleans thoroughly all the way down the barrel. Debris is deposited into the **collection shell** for easy disposal.

Fits All
12
GAUGE

Item # CS112 fits all 12 gauge except extra full turkey chokes .689" diameter and under.

A clean shotgun will result in more consistent shooting and enhanced accuracy.

Clean the entire barrel of your shotgun with The Clean Sweep!

Made in the USA

How The Clean Sweep Works

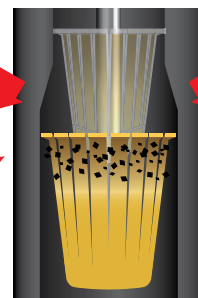

Mount the Guide Form and the Clean Sweep tool onto your 8-32 shotgun cleaning rod

Insert the Clean Sweep tool into the bore. The Guide Form will stop at the end and keep the rod aligned.

Brass SWEEPERS expand outward along the inside of the bore as *the diameter changes* clearing and collecting debris.

Move the Clean Sweep tool up and down the bore.

The Clean Sweep tool will collect debris and deposit it into the Collection Shell.
